

Streamline Campus Communications and Accelerate Delivery of Critical and Non-Critical Notifications

Regroup Mass Notification, the award-winning provider of mass notification solutions and proud Ellucian Community Partner, has been providing communication solutions to colleges and universities since 2006 when founded at Stanford University to improve campus communications. Our beginnings in higher education give Regroup a unique perspective on the communication challenges campuses face on a daily basis, as well as during crisis situations.

WHY REGROUP?

- ✓ An Official Ellucian Community Partner since 2009
- ✓ Ellucian's 2011 Emerging Partner of the Year
- ✓ Seamlessly integrated with Ellucian products
- ✓ The Official Ellucian Live Text Alert Sponsor since 2014
- ✓ The DRI International Notification System of the Year and winner of SSI Awesome Applications Award for Fire/Life Safety Solutions

DAY-TO-DAY

Deadlines for registration, financial aid documents and payment of tuition

Announcements of meetings, activities and special events

Campus news and fundraising appeals to alumni

Class schedule changes & waitlist notifications

EMERGENCY

Active shooters or other dangers on campus

Chemical spills and public health emergencies

Shelter-in-place or evacuation orders

Advance warning of severe weather

Class closures or delays

REGROUP MOBILE APP

Regroup's mobile app for iOS and Android gives you the ability to access the full power of your Emergency Notification System from the palm of your hand. With the simple and easy-to-use interface, you can send secure, two-way messages to students, faculty and staff or to emergency management. Push notifications ensure that your messages are received – even when other communication lines are saturated or down.

IVR POLLING

IVR polling capabilities facilitate greater information sharing to increase situational intelligence for better, more informed decision making. Users can create multi-layer questions and allow recipients to respond to the initial question, as well as ask any additional questions. This technology can be used to manage disruptive events or for gauging your constituents' opinion.

API SUITE

Our API Suite empowers organizations to automate numerous processes, including real-time, two-way database uploads via the Membership API, create and manage groups with the Group Management API and to automatically trigger emergency and routine notifications based on a defined criteria from Student Information Systems, HR Databases, Appointment Scheduling Systems and others via our Messaging API. Regroup can also be triggered from systems such as fire alarms to disseminate alerts to the users.
