

NWS/NOAA INTEGRATION

Keeping You One Step Ahead
of the Storm

THE CHALLENGE

When severe weather threatens, team members who are on-site, remote and traveling could find themselves in the crosshairs.

Organizations need a solution that can keep people alert and up-to-date of storm developments.

THE SOLUTION

Regroup's NWS/NOAA integration automatically sends real-time, location-based watches, warnings and alerts to your team members in any location across multiple channels.

THE MUST-HAVE SAFETY INTEGRATION

REAL-TIME ALERTS

Alerts from the National Weather Service and the National Oceanic Atmospheric Agency, delivered as they happen.

COMPLETELY AUTOMATED

Requires no administration. Recipients in your network receive notifications based on their location.

SIMPLE SETUP

Admins can determine which watches and warnings activate notifications. Updates and excessive alerts can also be suppressed to prevent message fatigue.

“Regroup Meets our needs and exceeds our expectations.”

— David A | VP, CIO - Enterprise

Since 2006, Regroup Mass Notification has provided a cloud-based, multi-channel mass notification platform for emergency and routine applications. Serving the educational community, enterprise, manufacturing, finance and government, Regroup's continual pursuit of excellence has made it the most trusted name in mass notification and a leading-edge provider of smart communication solutions for clients throughout North America.
